 - **Seventh Day Adventist Church, Central**, Maringá/PR 2002 - 2010
Development of a desktop system for members control - **Delphi 6, Firebird**.
-

OPEN SOURCE PROJECTS - CONTRIBUTION

Joomla CMS 2012 (present)

I joined the JUX, group responsible for the Joomla 3 release. I contributed with a bug fix and added a new feature to an existent JavaScript front-end component.

ACADEMIC WORK

Structured Portuguese Algorithms Interpreter 2005

The objective was to develop a tool that would be able to improve the algorithm development learning process. It should interpret a custom structured language, allow to parse, execute, show the result in a terminal, debug and translate algorithms in structured portuguese language to Pascal. The tool was fully implemented using **Delphi 7** and I really enjoyed to work on that project.

My greatest accomplishment came in 2006, when my tool **was used as support tool** for algorithm classes in **two state universities**: UNIPAR - Universidade Paranaense and in UEM - Universidade Estadual de Maringá.

LANGUAGES

- Portuguese
 - English
-

TECHNICAL KNOWLEDGE

- OOP, MVC, Modular Programming, Linux Server Management
- *Programing/Script Languages*: PHP, JavaScript, Python, Objective-C, Shell Script, Action Script 3
- *Databases*: MySQL, SQLite, MongoDB, Redis
- *Frameworks, Platforms, Libraries*: Joomla, Django, Nooku, CodeIgniter, Node.JS, jQuery, MooTools, Cocoa Touch, KnockoutJs
- *Other Languages*: HTML, CSS, LessCSS, JSON, XML
- *Source Code Control*: Git, Subversion
- *Methodologies*: SCRUM
- *Additional Knowledge*: iOS Development, Ajax, Web Sockets, RESTful Web Services, Regex, UML, Phing
- *OS*: Mac OS X, Debian/Ubuntu Linux, AWS Linux AMI, CentOS Linux, iOS, Windows 7
